LULU FEMME

THEME & TYPE SYSTEM · V1.0 · OCTOBER 2026

A burgundy atelier for a pink logo.

Three colour directions and three font pairings for the Lulu Femme website, built around the existing LF logo, which stays exactly as it is. Every colour pair is contrast-checked, and every value ships as CSS, SCSS and JSON tokens.

COLOUR

Atelier Burgundy

Burgundy actions, ivory and blush grounds, logo pink only for the logo, focus and highlights.

TYPE

Cormorant + Manrope

Garamond-style headings for the boutique voice; a clear geometric sans for prices, forms and navigation.

ACCESSIBILITY

AA everywhere, AAA on actions

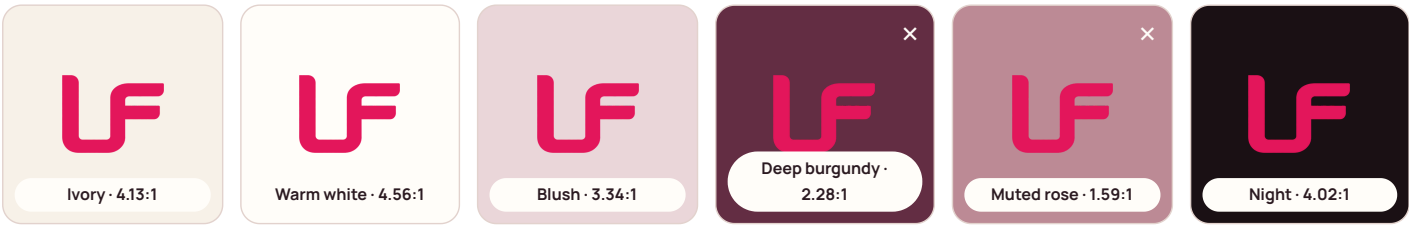

Ivory on burgundy 9.4:1. Muted rose demoted to decoration because it fails as text.

01 · CONSTRAINTS

The logo sets the rules

The logo is not changing, so the palette is built to suit it.

- Single colour: logo pink #E3165B (RGB 227, 22, 91), a cool magenta-red. It is never recoloured.
- Monogram: heavy geometric strokes with large rounded corners (about 15% of stroke length).
- Wordmark: wide, extended geometric sans in caps with generous letter-spacing; about 14:1 width to height.
- Because the logo is pink and only pink, every background it sits on must give it at least 3:1 contrast (WCAG 1.4.11, graphical objects).

Allowed grounds

Ivory, warm white, blush and the dark-mode Night colour. All give the pink logo at least 3:1.

Never

Burgundy (2.28:1) or muted rose (1.59:1) behind the logo, and never recolour, outline or add effects to it. On photos, place it on an ivory plate.

Clear space & size

Keep clear space equal to half the monogram height on every side. Minimum: monogram 24px tall, wordmark 120px wide.

02 · COLOUR

Three directions

Each direction assigns every role: background, neutrals, primary, secondary, accent and states.
Hex and RGB values are exact.

Atelier Burgundy RECOMMENDED

Your moodboard, made production-ready. Deep burgundy carries actions and headings, ivory and blush set a calm boutique ground, and the logo pink is kept for the logo, focus and the odd highlight.

BACKGROUND	NEUTRAL · SURFACE	NEUTRAL · TINT	NEUTRAL · TEXT	PRIMARY	SECONDARY	ACCENT
Ivory	Warm white	Blush	Ink	Deep burgundy	Muted rose	Logo pink
#F7F1E8	**#FFFDF9**	**#EAD6D9**	**#2B1A21**	**#632D43**	**#BC8A95**	**#E3165B**
RGB 247, 241, 232	RGB 255, 253, 249	RGB 234, 214, 217	RGB 43, 26, 33	RGB 99, 45, 67	RGB 188, 138, 149	RGB 227, 22, 91

- Burgundy and the logo pink share a red-violet hue family, so the logo reads as the brightest note of the same chord instead of a clash.
- Ivory text on burgundy is 9.4:1 (AAA), so primary buttons stay legible at every size.
- Muted rose fails as text (2.6:1 on ivory). It is kept for decorative fills and a darker Rose ink (5.0:1) takes over wherever rose text is needed.
- Keeping pink rare makes it work harder: the logo, focus rings and a single 'New' or 'Sold' tag are all that use it.

Strengths

- Most premium, boutique feel
- Strong AAA contrast on actions
- Matches your moodboard exactly

Trade-offs

- Biggest visual change from the current site
- Logo must never sit on burgundy (2.3:1)

TOKEN	COLOUR	HEX	RGB	ROLE	USE FOR

Rose Studio LOWEST EFFORT

An evolution of today's site. The logo pink becomes the button colour, plum takes headings, and the background warms from lime-cream to a soft ivory.

BACKGROUND	NEUTRAL · SURFACE	NEUTRAL · TINT	NEUTRAL · TEXT	PRIMARY	SECONDARY	ACCENT
Soft ivory	White	Petal	Ink	Logo pink	Plum	Logo pink
#FBF7F2	**#FFFFFF**	**#FCE7EF**	**#2A1320**	**#E3165B**	**#8E2550**	**#E3165B**
RGB 251, 247, 242	RGB 255, 255, 255	RGB 252, 231, 239	RGB 42, 19, 32	RGB 227, 22, 91	RGB 142, 37, 80	RGB 227, 22, 91

- Closest tie to the logo: the main action colour is the logo colour.
- White on logo pink is 4.6:1, AA at button size. Pink is too light for small text (4.3:1 on ivory), so links use Pink ink (#C8104F).
- Pink focus rings would vanish on pink buttons, so focus uses plum instead.

Strengths

- Smallest change for returning customers
- Bright, energetic, social-media friendly

Trade-offs

- Pink buttons only pass AA, not AAA
- Less 'curated luxury', more high-street

TOKEN	COLOUR	HEX	RGB	ROLE	USE FOR
`--lf-bg`	Soft ivory	#FBF7F2	251, 247, 242	Background	Page background

Ivory Noir

MOST EDITORIAL

A near-monochrome fashion look. Ink-black buttons on ivory let the bundle photos supply the colour; burgundy appears on hover and links; the logo is the only pink on the page.

BACKGROUND	NEUTRAL · SURFACE	NEUTRAL · TINT	NEUTRAL · TEXT	PRIMARY	SECONDARY	ACCENT
Ivory	White	Stone	Noir	Noir	Deep burgundy	Logo pink
#F7F1E8	**#FFFFFF**	**#EFE7DF**	**#1E1418**	**#1E1418**	**#632D43**	**#E3165B**
RGB 247, 241, 232	RGB 255, 255, 255	RGB 239, 231, 223	RGB 30, 20, 24	RGB 30, 20, 24	RGB 99, 45, 67	RGB 227, 22, 91

- Highest contrast of the three: ink on ivory is 16:1 (AAA) for text and buttons.
- With no competing colour, the pink logo becomes the signature.
- Burgundy hover keeps a thread to the moodboard without adding a new hue.

Strengths

- Timeless, high-fashion; photos stand out
- Easiest to keep consistent

Trade-offs

- Can feel cold without good photography
- Less ownable colour story

TOKEN	COLOUR	HEX	RGB	ROLE	USE FOR

03 · ACCESSIBILITY

Contrast checks

WCAG 2.1 ratios calculated from the exact hex values. Text needs 4.5:1 for AA and 7:1 for AAA (3:1 for large text, 24px or 19px bold). Logos, focus rings and field borders need 3:1.

04 · USAGE

How much of each colour

Roughly 60% ground, 30% supporting neutrals and tints, 10% colour. Keep the accent under 2% so the logo stays the brightest thing on screen.

ATELIER BURGUNDY

Last two slivers: Muted rose (4%) and Logo pink (2%).

ROSE STUDIO

Last two slivers: Plum (4%) and Logo pink (2%).

IVORY NOIR

Last two slivers: Deep burgundy (4%) and Logo pink (2%).

Do

- Page background: ivory. Product grids and forms: warm-white cards.
- Alternate long pages with blush bands to separate sections.
- Primary for one main action per view; secondary outline for the rest.
- Rose ink for eyebrows and tags on ivory or white.
- Pink ink for 'New', 'Sold' and active states, sparingly.
- States: hover darkens one step, pressed two steps, disabled uses the disabled pair.

Don't

- Don't set text in muted rose (2.6:1) or the logo pink below 24px.
- Don't put the logo on burgundy or rose.
- Don't use colour alone for errors; always add an icon and a message.
- Don't put rose ink text on blush (4.0:1); use burgundy there.
- Don't mix directions on one page.

Font pairings

All are free Google Fonts. The first pairing is your moodboard's and is recommended; the other two are tested alternatives.

Cormorant Garamond + Manrope RECOMMENDED

Aa

Pre-loved, perfectly curated.

Grade A Lululemon, hand-checked and sold in exact, filmed bundles. LF-07 · 20 pcs · £ on request.

SHOP BUNDLES · HOW IT WORKS

Headings Cormorant Garamond · 500, 600, italic 500

```
"Cormorant Garamond", "Cormorant", Garamond, "Times New Roman", serif
```

Body & UI Manrope · 400, 500, 600, 700

```
Manrope, ui-sans-serif, system-ui, -apple-system, "Segoe UI", Roboto, Arial, sans-serif
```

- The moodboard pairing. Cormorant's high-contrast Garamond forms say 'curated' and 'atelier' for headings and the brand voice.
- Manrope is a geometric grotesk with open apertures that stays clear at 12–14px for prices, forms and navigation.
- Set Manrope in caps with 0.16–0.18em tracking for eyebrows and nav: it echoes the logo's wide, spaced wordmark without copying it.

Watch out: Cormorant has a small x-height and fine hairlines. Never use it below 24px or for body text; use weight 600 under 40px.

Fraunces + Figtree CHEAPEST SWITCH

Aa

Pre-loved, perfectly curated.

Grade A Lululemon, hand-checked and sold in exact, filmed bundles. LF-07 · 20 pcs · £ on request.

```

- Figtree is already the site's body font, so only one new file loads.
- Fraunces is a single variable font: its optical-size axis keeps hairlines sturdy at small heading sizes, and SOFT 50 rounds the serifs to match the logo's rounded corners.

Watch out: Keep SOFT at 50 or below; higher values start to look playful rather than premium.

Bodoni Moda + Jost MOST FASHION

Aa

Pre-loved, perfectly curated.

Grade A Lululemon, hand-checked and sold in exact, filmed bundles. LF-07 · 20 pcs · £ on request.

SHOP BUNDLES · HOW IT WORKS

Headings Bodoni Moda · variable 500–700, opsz 6–96

```
"Bodoni Moda", Didot, "Bodoni 72", "Times New Roman", serif
```

Body & UI Jost · 400, 500, 600

```
Jost, "Futura PT", Futura, ui-sans-serif, system-ui, Arial, sans-serif
```

- A Didone headline is the fashion-magazine signal; Jost is a free Futura-style geometric that matches the logo's geometry closely.
- Both are variable fonts, so weights cost no extra downloads.

Watch out: Bodoni hairlines are fragile on low-resolution screens: display sizes (32px and up) only.

Type scale (recommended pairing)

Sizes scale smoothly between 375px and 1440px using CSS clamp(); the generated tokens include the formulas.

ROLE	SAMPLE	FONT · WEIGHT	DESKTOP / MOBILE	LINE HEIGHT	TRACKING	USE
Display	Curated	Cormorant Garamond 600	72 / 44px	1	-0.01em	Home hero headline only
H1	Curated	Cormorant Garamond 600	56 / 38px	1.05	-0.01em	Page titles
H2	Curated	Cormorant Garamond 600	40 / 30px	1.1	-0.005em	Section titles
H3	Curated	Cormorant Garamond 600	28 / 24px	1.2	0	Card and bundle names
H4	Curated	Manrope 700	20 / 18px	1.3	-0.01em	Sub-sections, table heads
Eyebrow	THE CATALOGUE	Manrope 700	12 / 12px	1.2	0.18em	Labels above headings, nav
Body L	Curated	Manrope 400	18 / 17px	1.6	0	Intros, hero sublines
Body	Curated	Manrope 400	16 / 16px	1.6	0	Running text (max 70 characters wide)
Small	Curated	Manrope 500	14 / 14px	1.5	0.005em	Meta, helper text, table cells
Caption	Curated	Manrope 500	12 / 12px	1.4	0.02em	Captions, legal, badges
Button	Curated	Manrope 600	15 / 15px	1	0.04em	Buttons and tabs (sentence case)
Data	LF-07 · 25 pcs	Manrope 600	16 / 16px	1.3	0	Prices, piece counts, codes

UI guidance

Live examples of buttons, links, navigation, forms, alerts and icons for each direction. Every control is at least 44px tall and keeps a visible focus ring.

07 · MOCKUPS

Atelier Burgundy on the home page

Rendered from docs/brand/mockup.html with the generated tokens: header, hero, catalogue, quote form and footer.

Desktop, 1440px

Mobile, 390px

Developer handoff

All files live in `docs/brand/` and are generated by `node docs/brand/build.mjs`, so change a value once in brand-data.mjs and rebuild.

`tokens.css`
Custom properties for all three directions plus Atelier dark, type scale, base, button and form styles.

`_tokens.scss`
Sass maps, **`lf-color()`**, **`lf-theme-vars()`** and **`lf-type()`** mixins.

`tokens.json`
Design-token JSON for Figma Tokens or Style Dictionary.

`mockup.html`
Responsive HTML/CSS mockup using tokens.css.

`swatches.png`
Swatch sheet of the three directions.

`style-guide.pdf`
This guide as a printable A4 PDF.

Map onto the current site (Next.js + Tailwind v4)

```
/* app/globals.css: map the new tokens onto the names components already use */
:root {
  --pink: #632D43;        /* buttons now burgundy (was logo pink) */
  --pink-hover: #4E2235;
  --pink-ink: #B0103F;    /* accent text */
  --on-pink: #F7F1E8;
  --plum: #632D43;        /* headings */
  --ink: #2B1A21;
  --muted: #6E5A61;
  --blush: #EAD6D9;
  --offwhite: #F7F1E8;    /* page background */
  --card: #FFFDF9;
  --line: #E2D2CD;
  --line-strong: #8C7480;
}
/* focus ring stays logo pink */
:focus-visible { outline: 3px solid #E3165B; outline-offset: 2px; }

@theme inline {
  --font-display: var(--font-cormorant), "Cormorant Garamond", Garamond, serif;
  --font-sans: var(--font-manrope), Manrope, ui-sans-serif, system-ui, sans-serif;
}
```

```
// app/layout.tsx
import { Cormorant_Garamond, Manrope } from "next/font/google";

const cormorant = Cormorant_Garamond({
  subsets: ["latin"], weight: ["500", "600"], style: ["normal", "italic"],
  variable: "--font-cormorant", display: "swap",
});
const manrope = Manrope({ subsets: ["latin"], variable: "--font-manrope", display: "swap" });
```

SCSS usage

```
@use "tokens" as *;

.button-primary {
  background: lf-color("primary");
  color: lf-color("on-primary");
  @include lf-type("button");
}
h1 { @include lf-type("h1"); color: lf-color("primary"); }
```

09 · ROLLOUT

Implementation checklist

01	Decide	Pick the direction (Atelier Burgundy recommended) and font pairing; sign off this guide.
02	Fonts	Load Cormorant Garamond 500/600/500i and Manrope 400–700 with next/font; remove Anton. Set font-display: swap and real fallback stacks.
03	Tokens	Replace the colour variables in app/globals.css with tokens.css values (mapping table below). Keep names stable so components don't change.
04	Logo	Do not edit logo files. Audit every place the logo appears: bg, surface or tint only. Never on burgundy, rose or photos without an ivory plate.
05	Buttons & links	Primary = burgundy fill / ivory text; secondary = burgundy outline; links burgundy with 1px underline; hover links in pink ink.
06	Focus	One focus style everywhere: 3px logo-pink outline, 2px offset. Check it on every interactive element with the keyboard.
07	Forms & states	Field borders use border-strong (≥3:1). Errors: garnet text + border + icon + message. Success: sage text + icon.
08	Muted rose	Search for rose used as text or icons and swap to rose ink. Keep rose only for fills and decoration.
09	Dark mode	Apply the Atelier dark tokens; check the logo on Night (4.0:1) and every pairing in the contrast table.
10	Test	Run the axe test suite (npm run test:a11y) and review home, bundle, quote and about pages at 375, 768, 1024 and 1440px.
11	Launch	Update Open Graph images and favicon background to ivory; clear the CDN cache; spot-check on a real phone.
